

Fracestown Conservation Commission
Conservation Plan / NRI Subcommittee

Minutes

9/28/11

Meeting came to order at 5:30 pm, lower level meeting room at the town office building. Betsy Hardwick, Pete Throop, Ben Haubrich, Linda Kunhardt present.

The proposed fall workshop/forum was discussed; Pete suggested we begin with a wildlife workshop put on by Amanda Stone and Lindsey Webb from NH Fish & Game and UNH Cooperative Extension that will include information on the Wildlife Action Plan and copies of the most updated wildlife habitat maps for our town. Various ideas for the workshop were discussed, including have public input on what might be missing from the current WAP maps, having a questionnaire for people to fill out that might include what natural resources or other areas are important to them, and a ranking list of those. Reviewed sample questionnaire from other town and agreed that the general idea would be good.

A tentative date of November 10th was set for the workshop. Pete will confirm, and work on a questionnaire that follows what was discussed. Hardwick will prepare an article for the Fracestown News about the workshop.

Work on updating resource maps continues.

Meeting adjourned at 6:30
